

Nfina 100 Series PC

FEATURES:

- Windows® or Linux® OS, others available
- Ultra-small footprint
- Multiple choices of processor
- 1 x internal 2.5" SATA HDD/SDD
- 1 x internal M.2 SATA or PCIe® SSD¹
- Up to 32GB DDR4-2400 SO-DIMM
- Up to 32GB Intel® Optane™ memory¹
- 1 x SDXC or Micro SDXC card slot
- 10/100/1000Mbps Ethernet
- Thunderbolt™ 3 with 40Gbps transfer rate¹
- 4 x USB 3.0 or 3.1 ports (2 front, 2 back)
- HDMI® 2.0a w/4K @ 60Hz display support
- 802.11ac wireless support
- Bluetooth® 5.0
- Standard VESA® mount included

The Nfina 100 series PC. Small in size, big in capability - by any measure.

The Nfina Technologies 100 Series PCs is a family of fully functioning, energy-efficient computers in an extremely compact form factor. This scalable computing platform can be configured with a choice of three different eighth generation Intel® Core™ processors, or an Intel® Celeron® processor. The Nfina 100 Series also supports standard VESA mounting enabling it to easily be mounted on the back of a standard monitor.

The Nfina 100 Series can be used for a variety of applications, including Productivity, Digital Signage, Thin Client, Home Entertainment, Home Storage, Surveillance, Gaming, and other commercial uses.

Our products and components are manufactured to the highest quality standards in the industry for use in the most demanding 24/7 data center applications.

Nfina products deliver exceptional functionality by creating products that are easily customized to fit specific applications. Designed and built for virtualized computing environments, our products provide high-density, maximum yield solutions for our customers. Multiple options for high performance computing, including I/O, RAID, storage, and memory options make our products a custom fit for many applications.

All Nfina Technologies' servers are backed by a five-year limited warranty and include 24x7 tech support with remote diagnostics. Next day and four hour onsite response options are available.
