The Nfina 418i2 Compact, High Performance Desktop Server with a Five-Year Warranty

The Nfina 418i2 is designed for high performance use in a wide range of server applications. No larger than a typical desktop computer, it combines power, efficiency, price, and performance in a compact package. Ease of setup and deployment, outstanding server performance, and storage expandability make it a product that is fully capable of meeting small business requirements of today as well as the demands of the future.

Nfina Technologies 400 Series Servers are a great choice for small businesses that require a powerful computing platform in a compact package.

Our products and components are manufactured to the highest quality standards in the industry for use in the most demanding 24/7 data center applications.

Nfina products deliver exceptional functionality by creating products that are easily customized to fit specific applications. Designed and built for virtualized computing environments, our products provide high-density, maximum yield solutions for our customers. Multiple options for high performance computing, including I/O, RAID, storage, and memory options make our products a custom fit for many applications.

All Nfina Technologies' servers are backed by a five-year limited warranty and include 24x7 tech support with remote diagnostics. Next day and four hour onsite response options are available.
