

Nfina Hyper-Edge™ 116RP

FEATURES:

- 1U short-depth, single socket, rack-mount enclosure
- Intel® Xeon® Processors E-2200 & E-2100 Series (1 per chassis)
- Up to 3.4GHz to 5.0GHz processor speed
- Intel® UHD Graphics on processor w/ 4K support
- 128GB max memory (per chassis)
- 8 x 3.5" hot-swap drives (4 per chassis)
- Add up to 6 x JBODs for additional storage
- 4-way mirror storage
- 2 x 1GbE and 4x 10GbE Ethernet ports (per chassis)
- Choose OS; Microsoft® Windows Server® or VMware ESXi®
- Up to 8 VMs
- Open-E® JovianDSS, storage pool mgmt. software w/ no single point of failure
- Nfina EdgeStore™ 4TB or 8TB License
- Offsite data backup and cloud restoration available
- 5-year warranty with 24x7 Tech Support (other options avail.)

Nfina's Hyper-Edge reduces network latency and congestion while lowering your processing costs.

Nfina's Hyper-Edge™ 116RP reduces network strain by making it possible to send only the most valuable and relevant data to the edge servers thus making data processing timelier. Nfina's Hyper-Edge products put information processing (Data Entry, Storage, Compute, Point of Sale, or SMB's) closer to your edge applications. With Nfina powering your edge, you can improve security and compliance, achieve faster response times, create redundancy, reduce latency, lower cost, and complement your existing cloud computing infrastructure.

To ensure data security and retention, four software, backup and disaster recovery options are offered with our Hyper-Edge products: **Nfina EdgeStore**, software included with smaller capacity storage, provides integration for local and offsite data backup and disaster recovery. Unlike many of our competitors, you can choose to store your offsite storage where you like; the cloud, colo, or with Nfina Cloud. **Open-E JovianDSS**, software included with larger capacity storage, helps create and manage HA clusters on your Hyper-Edge device and provides no single point of failure. Features include tiered RAM, unlimited snapshots with instant restore, compression and deduplication, and on and offsite data protection. **Nfina Cloud**, a cloud-based subscription service, allows you to safely back up your Edge and Hyperconverged products. Your data is encrypted before it crosses the wire and remains encrypted during transmission and while stored. Only your organization holds the encryption key. **Nfina Restore** allows you to quickly recover data in the event of a Server or Storage system catastrophic failure. Easily restore individual files, folders, VMs, or even an entire SAN from your cloud storage.
